Introduction

I'm Kushal Rathod, a 2nd-year BTech CSE student and a passionate Full Stack Web Developer, with a stronger inclination towards Frontend development and technologies like React, NextJS. I love exploring ways to integrate AI into websites, making them smarter and more interactive. Working with friends and teams to develop innovative ideas excites me, and I thrive in collaborative environments. I'm always eager to learn, experiment, and create something that truly stands out.

Education

H.B.Kapadia *Mar 2022 – Apr 2023*
Higher Secondary (12th)

- Percentile: 94.48

Ahmedabad University *Jul 2023 – Present*
BTech in Computer Science and Engineering (CSE)

- GPA: 3.22/4.0

Experience

Tech Intern *Ahmedabad*
Bijoi *May 2025 - June 2025*

- Worked as a tech intern at Bijoi, contributing to the maintenance and improvement of their website.
- Added new components such as the **About Us** page, resolved search-related bugs, and corrected routing issues.
- Gained exposure to various aspects of a startup environment and actively participated in brainstorming innovative ideas for the platform.

Web and Investigation Team *Ahmedabad University*
ACM - AU *Oct 2024 - Present*

- Developing and designing the frontend for ACM AU's official website as part of the Web Development and Investigation team, contributing to its structure and user experience.
- Participated as a volunteer from ACM in the GRAINS 2024 conference, held at AU and hosted by ACM AU in October 2024.
- Conducted a basic web development workshop for ACM members, helping them understand fundamental web technologies.

Volunteer *Ahmedabad*
Gyan Prakash NGO *Jun 2024 - Jul 2024*

- Volunteered at Gyan Prakash NGO in Ahmedabad for a month, teaching Maths and English to students from grades 1 to 8, who come from economically weaker backgrounds.
- Focused on making learning interactive and engaging by incorporating activities and games.
- Conducted two informative sessions on environmental protection and pollution, raising awareness among students about sustainability.
- Organized playful learning sessions to enhance students' understanding of concepts in a fun and effective way.

Achievements

- Secured first place in WMC 5.0 with *Los Santos Elite*, my first major web development project.
- One of the best contributors for the Winter of Codes 2024, starting my journey in the field of Open Source contributions.

Projects

Los Santos Elite

github.com/Los-Santos-Elite 

- Developed Los Santos Elite, a GTA-V-themed e-commerce platform in a month during WMC 5.0, enabling users to buy/sell properties and vehicles with features like Google authentication and a payment gateway, marking my first web dev victory.
- Tools Used: HTML, CSS, JavaScript, Bootstrap, NodeJS, MongoDB

Bored.exe

github.com/Bored.exe 

- Created Bored.exe, a website designed to make boring lectures more fun by randomly redirecting users to engaging websites based on their selected preferences.
- Tools Used: ReactJS, TailwindCSS; NodeJS, MongoDB

Perfect-Research

github.com/Perfect-Research 

- Developed Research Perfect, a tool that simplifies finding an author's H-index by web scraping data from Google Scholar, eliminating the need for manual searches and making research easier for students and researchers.
- Tools Used: ReactJS, TailwindCSS, PuppeteerJS

Technologies

Languages: C++, HTML, CSS, JavaScript, ReactJS, NodeJS, ExpressJS, NextJS, TypeScript

Technologies: Bootstrap, TailwindCSS, MongoDB, GitHub, VSCode, Excalidraw
